

Finally, no more gel hell.

REALA

Say goodbye to mixed lighting nightmares with new REALA 500D Motion Picture Film, exclusively from the creative minds at Fujifilm.

"I can recall a thousand times when I could have used this film stock..."

— Douglas Koch, csc – Director of Photography

Now those hours spent sleeving tubes and gelling windows can be applied to getting a more natural, visually-striking shot. Using Fujifilm's unrivaled 4th colour layer technology, new REALA 500D helps balance mixed lighting (fluorescents, tungsten, daylight...) to deliver superb results. With less hassle, less delay and more efficiency. New REALA. The fix for mixed lighting.
