

Mixed lighting sources? One film source.

REALA

Mixed lighting is usually a source of frustration. Not anymore. Introducing new REALA 500D Motion Picture Film, exclusively from Fujifilm.

"This film has an amazing ability to correct colour temperature shifts, especially from fluorescents, with no filtration needed!" — Glenn Durrell, Professional Photographer

Now those hours spent sleeving tubes and gelling windows can be applied to what matters most—getting the shot you want. Using Fujifilm's unrivaled 4th colour layer technology, REALA 500D helps balance mixed lighting (fluorescents, tungsten, daylight...) to deliver superb results. With less hassle, less delay and more flexibility. New REALA. Get it straight from the source. Fujifilm.

DIGITAL
MEDIA
CENTRE

Toronto's only training centre for Flame & Smoke

You don't need to drive very far to make your budget go far.

A warehouse in the hinterlands may be cheap but is it really good value? We have multiple stages, production offices, art departments, editing suites, wardrobes, carpentry shops, storage... all fully serviced and economically priced.

Put your money on the screen, not in fixing up a facility!
