

MEDIA

**Whether the medium is television, film,
or digital animation, OFDC helps it grow.**

Our expansion theory combines tax credits for domestic and foreign production, skills development for content producers, and marketing. Last year, we helped Ontario's cultural media sector achieve record high levels of production activity.

**If you're looking to access Ontario's production
infrastructure and incentives, give OFDC a call.**

We're working to grow your medium.

Any workstation
can do graphics. Only one
is specifically designed to
make you say,

It's SGI

Introducing the newest addition to the SGI® family of visual workstations. The operating system is Windows NT®. And the computer is pure SGI. Featuring our Integrated Visual Computing (IVC) architecture with the Cobalt™ graphics chipset, these breakthrough machines move graphics data six times faster than AGP 2X-based workstations*—a massive 3.2GB per second. What's more, our IVC architecture integrates I/O Ethernet, IEEE-1394,† USB and professional video I/O for a blistering 12-fold increase in bandwidth over other PC workstations.** Finally, you can get the outrageous 2D, 3D and digital media performance you expect from SGI—for about the price of a mere clone. The SGI 320™ workstation starts at just \$5,568. Or choose the SGI 540™ workstation.†† Supporting up to four Intel® Pentium® II Xeon™ processors, it's the most scalable Windows NT workstation around. Either way, your computer will scream. And so will you.

STARTING
@
\$5,568

[SGI 320 Visual Workstation]

- SGI Integrated Visual Computing architecture with Cobalt graphics chipset
- Supports up to two Intel® Pentium® II processors (up to 450MHz)
- Ultra ATA or optional Ultra2 SCSI drives up to 28GB total capacity
- Microsoft® Windows NT® 4.0
- Scalable up to 1GB ECC SDRAM
- Add the SuperWide™ 17.3" SGI 1600SW™ digital flat panel monitor (shown) for only \$4,009
